Abstract

The invented oral liquid uses such traditional Chinese medicinal herbs as raw material as ginseng, cnidium fruit, longspur epimedum, spongilla fragilla, seed of chives, seeds of onion, oyster, fruit of glossy privet, beesource pollen, Morinda root, sea otter and jujube. The finished product is obtained in accordance with the dosage of the recipe and through a specific technology. The curative effect is significant for impotence, premature ejaculation, sterility due to azoospermia, emission, and sexual involution etc. diseases due to weakness of renal function. It is safety, reliable and without side effects. It can be taken by normal person for strengthening the function of kidney, invigorating yang, stimulating the activeness and delaying the senility.
